KEY ACHIEVEMENTS

📈 **70%**
Reduction in manual
SEO auditing time

📈 **45%**
Increase in organic
traffic achieved

📄 **50+**
Major technical
projects delivered

🖥 **100%**
Technical compliance
across all web pages

TECHNICAL SKILLS

📄 **PROGRAMMING LANGUAGES**
• C++ • Python
• JavaScript (ES6+)

🐍 **PYTHON LIBRARIES**
• Pandas • NumPy
• Matplotlib • Seaborn

🌐 **WEB SCRAPING & AUTOMATION**
• Requests • BeautifulSoup
• Selenium • Zapier • n8n

🖥 **FRONTEND DEVELOPMENT**
• HTML5 • CSS3 • JavaScript
• React • Bootstrap

🗄 **DATABASES**
• MySQL • MongoDB

🔍 **SEO EXPERTISE**
• On-Page SEO • Off-Page SEO
• Technical SEO

EDUCATION

🎓 **Bachelor of Science
in Computer Science**

University of Central Punjab,
Sialkot, Pakistan

📅 Dec 2023 – Present

SUMMARY

Results-driven **Data Science and Software Development** enthusiast with proven skills in Python, MySQL, MongoDB, and data visualization libraries (Pandas, NumPy, Matplotlib, Seaborn). Experienced in **web scraping, automation, and predictive analytics**, with a strong foundation in algorithms, data structures, and software engineering. Adept at translating complex datasets into actionable insights to support business decisions. Additionally skilled in **Frontend Web Development** (HTML, CSS, JavaScript) and **SEO strategies**, combining technical expertise with business acumen. Passionate about solving real-world problems through clean code, intelligent automation, and data-driven decision-making.

EXPERIENCE

Cyber Web Solution, Sialkot, Pakistan
Search Engine Optimization Specialist

May 2024 – Jun 2025

- Engineered automated SEO workflows using Python and n8n, reducing manual auditing time by 70% and ensuring 100% technical compliance across all web pages.
- Developed scalable web scraping scripts (Selenium/BeautifulSoup) to perform real-time competitor analysis and keyword extraction, driving data-backed ranking strategies.
- Boosted organic traffic by 45% and optimized CTR by deploying automated on-page optimization tools and programmatic internal linking structures.
- Architected live performance dashboards using Zapier and Google Data Studio to automate ROI reporting and monitor SERP fluctuations in real-time.

PROJECTS

Early-Stage Diabetes Risk Prediction (Python, Data Science)

[GitHub](#)

- Cleaned and pre-processed a healthcare dataset, applied statistical techniques, and visualized patterns with Pandas, NumPy, and Seaborn.
- Contributed to a research paper highlighting predictive modeling approaches for early diabetes detection.

Hospital Management System (Python + MySQL GUI)

[GitHub](#)

- Designed and normalized a relational database and connected it with a Python-based GUI for real-time patient, doctor, and billing management.
- Implemented full CRUD operations with secure data handling.

Esports Data Scraping & Analysis (Python)

[GitHub](#)

- Automated scraping of esports statistics using Requests and BeautifulSoup.
- Processed and structured raw data with Pandas to derive insights into player and team performance.

Online Job Portal (C++ with DSA Concepts)

[GitHub](#)

- Built a console-based job portal system implementing job posting, user registration, and application tracking.
- Applied advanced DSA concepts (stack, queue, priority queue, linked list) for efficient data handling.
